Fertilizers, no other kinds being available to planters for immediate returns for their investments.

This Company, under the direction entirely of Southern men of high character, offers inducements which will recommend it to Southern planters. Their works are among the largest and most complete in the United States, and enable them to prepare at home an abundant supply of the proper solvent for the South Carolina native Bone Phosphates which are near by. From these Poosphates they propose to manufacture a Fertilizer even richer in soluble Phosphate than those made from raw bones, and containing more than twice the abuntity of Super-Phosphate of Lime found in the best average Manures heretofore offered for the rates at which we offer them being no higher than the average price of other Fertilizers, while the Manures contain twice as much fertilizing material; they are in fact much cheaper to the consumer. They are offered on the market in two forms, with a guarantee that the material in each will correspond to the advertisement.
